### **DETAILED ACTION**

The examiner received a call from Ashley Pezzner on 06/28/2011 arguing that the case should be in position for allowance and the after final amendment was in response to the objected allowable subject matter of claims 28-31 which are currently written in independent form. The details of the interview can be found in the attached interview summary.

The examiner agrees with the arguments; therefore, finality has been withdrawn and the reasons for allowance are set forth below.

### **Allowable Subject Matter**

1. The following is an examiner's statement of reasons for allowance: applicant claims:

An optionally substituted oligomer or polymer comprising a repeat unit of formula (I):

wherein  $n$  is at least 1; each  $\text{A}$  is a nitrogen atom or optionally substituted phosphorus atom; each  $\text{Ar}^1$  is the same or different and independently represents an optionally substituted arylene or heteroarylene; each  $\text{Ar}^2$  is the same or different and independently represents an optionally substituted aryl or heteroaryl;  $\text{Ar}^3$  represents an optionally substituted arylene or heteroarylene comprising a linking ring to which the two atoms  $\text{A}$  are both directly linked; and at least one of  $\text{Ar}^2$ , and / or either or both of  $\text{Ar}^3$  is substituted with at least one substituent

and at least a second repeat unit,

wherein the second repeat unit is selected from optionally substituted phenyl, spirobifluorene, indenofluorene, heteroaryl or dihydrophenanthrene.

A search of the prior art did not show the claimed invention. The closest prior art appears to be Towns (WO 03/035714) who discloses an oligomeric material where the first repeat unit is represented by Formula T-1A (page 3):

wherein  $\text{X}_1$  and  $\text{X}_2$  are the same or different polymerisable groups and wherein  $\text{Ar}_1$ ,  $\text{Ar}_2$ ,  $\text{Ar}_6$ ,  $\text{Ar}_7$ ,  $\text{Ar}_8$ ,  $\text{Ar}_9$ ,  $\text{Ar}_{10}$  are the same or different substituted or unsubstituted aryl or

heteroaryl groups. Examples of groups  $Ar_1$ ,  $Ar_2$ ,  $Ar_3$ ,  $Ar_4$ ,  $Ar_5$ ,  $Ar_6$ ,  $Ar_7$ ,  $Ar_8$ ,  $Ar_9$ , and  $Ar_{10}$  include such groups as phenylene, thiophene, pyrrole, furan, pyridine and biphenylene.

The aryl or heteroaryl groups  $Ar_3$ ,  $Ar_4$ ,  $Ar_6$ ,  $Ar_9$ ,  $Ar_7$ ,  $Ar_8$ ,  $Ar_9$ , and  $Ar_{10}$  may be substituted with moieties selected from the group comprising alkyl, perfluoroalkyl, alkylaryl, arylalkyl, heteroaryl, aryl, alkoxy, aryloxy and thioalkyl. Preferred substituents are butyl and sec-butyl.

Towns Formula T-1A reads on applicant first repeat unit where  $Ar_6/Ar_8$  and  $Ar_9/Ar_7$  correspond to  $Ar_1$ ,  $Ar_2$  and  $Ar_3$  in applicants' Formula 1.

Towns teaches that the second repeat unit can be a phenyl group but fails to teach a second repeat unit composed of spirobifluorene, indenofluorene or dihydrophenanthrene.

There appears to be no reason to modify the second repeat unit of Towns to arrive at the claimed oligomer/polymer material.

2. Claims 1-5, 7, 9-10, 13-28 and 29-31 allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
